

AMERICAN WEB CODERS  
YOUR TRUSTED PARTNER FOR  
AWARD-WINNING  
WEBSITES

## ABOUT US

Established in 2012, **American Web Coders** is a passionate team of 400+ designers, developers, strategists, and account specialists based in California. We are driven by a shared love for creating exceptional digital experiences that elevate brands and empower businesses to achieve their growth goals.

## WHAT WE DO

We offer a comprehensive suite of services to take your online presence to the next level. From crafting beautiful & user-friendly websites to developing data-driven digital marketing strategies, we help you:

- ➔ Increase Sales and Brand Awareness
- ➔ Drive Targeted Traffic
- ➔ Build Stronger Customer Relationships
- ➔ We are More Than Just Coders

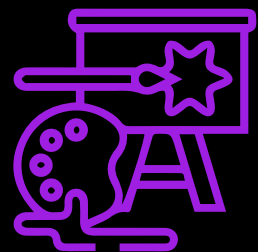

☎ For Sales: 408-728-6805

We are problem solvers. We take the time to understand your unique business needs and goals before creating a customized website that delivers measurable results. We are your partners in success, every step of the way.

# OUR PROCESS

We've earned the reputation of "process nerds" for a reason. Our proven, transparent approach ensures seamless collaboration and high-quality results.

Once the basic version has been created, the head designers will work on converting your blueprints into finished design layouts. In case you are unable to provide us with specific content, we will use dummy content to finish the layout and our content team will work on creating content for your website.

## DESIGN:

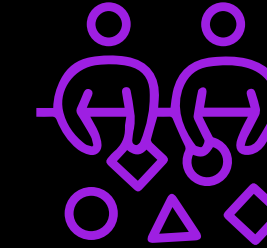

You might come with different ideas or not agree with the overall experience that we craft: hence we will give you the freedom to get your website customized just according to your preference. Your feedback will not only be valued but also implemented.

## REVISIONS:

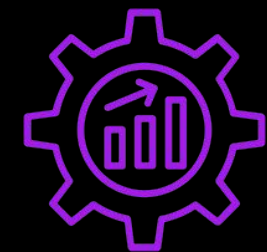

Once your order is confirmed, our project management team gets started on research to evaluate the industry & competitors of your brand. This allows them to wireframe something that is not only befitting for your business model but also effectively communicates with your audience.

## RESEARCH:

Once our research is completed, our experts draft out the basic design ideas. These concepts are simply blueprints or mockups which are a first step towards creating exceptional web experiences that will communicate and connect the web visitors with your brand.

## IDEATION:

After the basic design has been created and approved by you in regards to layout and basic structure of the website, our development team will work on developing a stunning website keeping your brand and industry in mind. We work on colors that match and reflect your brand's logo so they both can complement each other.

## DEVELOPMENT:

Once you are **100% Satisfied** with your design, content, functionalities and imagery of the website, we will finalize your website. Our team of experts will go ahead with the final launch of your website and handover the project to you after the official closure.

## FINALIZATION:

# WE BELIEVE IN FOSTERING A COLLABORATIVE & **RESULTS-ORIENTED ENVIRONMENT BUILT ON:**

## 01

### **Client-First Mentality:**

We treat our clients as partners, offering ongoing support throughout the entire process.

## 02

**Caroline Carter**  
CLIENT OF AGENCY

“So, I have a small traditional business that I was looking to take online because, that’s where the shopping trends are right, everybody is doing online shopping. So, I needed to get my business up to speed and as a result I would save on cost and extra expenditures. So, I reached out to eCommerce professionals at American Web Coders and right away I was impressed. Their senior account manager, he contacted me, and helped me with my website’s wireframe...

**So Glad I Contacted These Professionals!**
